PROFESSIONAL PROFILE

Software Analysis and Development Technologist (SENA, Colombia) with six months of hands-on experience in data engineering and AI-driven automation, gained through a formal SENA apprenticeship at SoftwareOne. Contributed to a Business Intelligence platform migration (MicroStrategy to Power BI) and a large-scale document repository migration in SharePoint, and designed an AI agent that cut technical documentation time from up to two days to roughly one hour. Solid technical foundation in Python, SQL, Django, and Linux, with proven experience working autonomously in a hybrid setup and communicating directly with clients.

PROFESSIONAL EXPERIENCE

SoftwareOne (IG Services S.A.S.) — Bogotá, Colombia · Hybrid

Sep 17, 2025 – Mar 16, 2026

SENA Apprentice – Junior Data Analyst · Data Engineering Track

- Executed the migration of over 10 TB of enterprise SharePoint documentation as the team member directly responsible for the file release and transfer phase, within a 4-person team; delivered more than 20 progress reports in PDF with daily tracking of processed volume, contributing to the team's combined result of reducing obsolete storage by 60%.
- Designed and proposed, through prompt engineering in Microsoft Copilot Studio, an AI agent that analyzed SQL queries of 500 to 1,000 lines to automatically extract and document tables, filters, and metrics, cutting per-report documentation time from up to 2 days to roughly 1 hour and eliminating duplicate-mapping errors. Used the tool individually for most of the project and handed off the documented process to a teammate before completing the apprenticeship.
- Automated the previously manual data-loading step within the existing MicroStrategy-to-DAX conversion workflow, reducing frequent fatigue-driven human errors, particularly incomplete DAX measures caused by a missed filter.
- Contributed to validating more than 15 reports migrated from MicroStrategy to Power BI within a 7-8 person team; during a roughly two-week QA phase, developed one complete report together with a teammate, splitting the work between DAX data modeling and dashboard visualization.
- Presented progress updates and technical reports directly to the BI migration project's client, strengthening client confidence in the process.
- Consolidated the technical documentation process into a reference model, with support from Claude, to hand off the knowledge to a teammate before finishing the apprenticeship.
- Completed corporate training in Power BI, Python, Microsoft Fabric, strategic use of AI, and data management, plus a specialized workshop on building AI models with Gemini.

PROJECTS

Role-Based eCommerce Platform — Academic Project, SENA

2024

- Took over full development of an originally group project — Django backend with REST architecture, database migration from SQLite to PostgreSQL, QA, and Linux deployment — individually, after low participation from the rest of the team.

TECHNICAL SKILLS

Languages & data: Python, SQL, Pandas, NumPy, relational data modeling

Backend & APIs: Django, FastAPI, REST API design

BI & visualization: Power BI, DAX, Microsoft Fabric

Databases: PostgreSQL, SQLite, query optimization

AI & automation: Prompt engineering (Microsoft Copilot Studio), applied use of ChatGPT, Gemini, and Claude

DevOps & environment: Linux, Git, GitHub, Docker, virtual environments

Self-directed learning: Scikit-learn and Machine Learning fundamentals

EDUCATION

Software Analysis and Development Technologist — SENA, Bogotá, Colombia

2023 – 2026

- Nationally recognized technical degree in Colombia, equivalent to an Associate's Degree in Software Development.

Academic High School Diploma — Centro de Promoción San José, Bogotá, Colombia

2021 – 2022

- Graduated with Honors for outstanding performance in mathematics, Spanish, and English.

CERTIFICATIONS & RECOGNITIONS

- Winner — AI Prompt Challenge, Bogotá Region · SoftwareOne, 2025
- Corporate Certification in Generative AI · SoftwareOne, 2025

LANGUAGES

Spanish: Native

English: Upper-intermediate technical reading comprehension; basic spoken and listening proficiency, actively improving.
