PROFESSIONAL SUMMARY

Backend developer and data analyst with hands-on enterprise experience in BI modernization, large-scale data migration, and strategic AI automation. Specialized in Python, SQL, and REST API development, with a proven track record of applying Generative AI and prompt engineering to compress multi-day manual processes into minutes. **Won an internal company-wide AI Challenge (Bogotá region)** for strategic AI application. Currently evolving toward ML/AI Engineering, with a focus on building and deploying production-ready AI solutions.

PROFESSIONAL EXPERIENCE

Data Analyst (Intern → Backend Developer) · [SoftwareOne](#) · Bogotá, Colombia · On-site2025 – Present

Enterprise-grade projects involving BI migration, document management modernization, and AI-driven process automation.

- Rewrote complex analytical logic from MicroStrategy to DAX in Power BI, ensuring functional parity and measurable performance gains.
- Migrated SharePoint document environments managing up to 10 TB of historical data (4+ years), achieving ~60% storage reduction through structured cleanup.
- Built and orchestrated AI agents using Microsoft Copilot Studio and prompt engineering, reducing multi-day manual workflows to minutes — earning an enterprise certification and winning the internal AI Prompt Challenge (Bogotá region).
- Performed SQL query analysis, cross-metric validation, and QA testing across large relational datasets.
- Produced technical documentation for client-facing deliverables and supported change adoption processes.
- Transitioning into backend development within the same enterprise project (upcoming).

KEY PROJECTS

BI Platform Migration · [SoftwareOne](#) · 2025

- Translated complex legacy analytics (MicroStrategy) into optimized Power BI / DAX models.
- Identified and resolved inherited metric inconsistencies from the legacy system.
- Optimized data models for improved visualization performance and reporting speed.

Enterprise Document Migration — SharePoint · [SoftwareOne](#) · 2025

- Structured migration of multi-year historical data with zero data loss.
- Reduced obsolete content by ~60%, reorganizing document architecture for long-term scalability.
- Delivered full technical documentation package for client handoff.

eCommerce Platform with Role Management · [Academic Project](#) · [SENA](#) · 2024

- Full-stack backend built with Django and REST architecture.

- Migrated database from SQLite to PostgreSQL; managed full deployment on Linux.

TECHNICAL SKILLS

AI & Automation: Prompt Engineering, AI Agent Orchestration (Copilot Studio), Generative AI, LLM workflows

Languages & Data: Python, SQL, relational data modeling, data cleaning & structuring

ML & Data Science: Pandas, Scikit-learn, NumPy (learning: PyTorch, TensorFlow)

Backend & APIs: FastAPI, Django, REST API design

BI & Visualization: Power BI, DAX, enterprise metric analysis

Databases: PostgreSQL, SQLite, complex query optimization

DevOps & Tooling: Docker, Git, GitHub, Linux, virtual environments

Process & Quality: Technical documentation, QA testing, functional validation

CERTIFICATIONS & RECOGNITION

- AI Prompt Challenge — Winner, Bogotá Region · SoftwareOne · 2025
- Enterprise AI Certification for strategic application of Generative AI · SoftwareOne · 2025

EDUCATION

Technologist in Software Analysis & Development · [SENA](#) · Bogotá, Colombia2023 – 2025

- Equivalent to an Associate's Degree in Software Development (nationally recognized Colombian technical education).

High School Diploma (Bachiller Académico) · [Centro de Promoción San José](#) · Bogotá, Colombia2021 – 2022

- Graduated with Honor Medal — outstanding performance in mathematics, Spanish, and English.

LANGUAGES

Spanish: Native

English: Professional working proficiency — reads technical docs, writes in Slack/GitHub, participates in async teams
